Hello Richard, Before playing this game I was lonely and awkward. I stumbled upon this game during one of my darkest hours, I took a leap and purchased. To my astonishment I finally found the light at the end of the tunnel. Twenty-Five minutes into the cookbook of seduction, I noticed my scrotum felt heavier, I checked. To my surprise my testicles had swollen exponentially. I immediately saw a doctor, she examined and was amazed by my man-hoods. I decided to carry out one of your alpha male power moves, I removed myself from the room, creeping back in silently I snuck behind her desk chair and whispered "Do you like dog fights?". One thing led to another. Richard I must say my one downside to this purchase is that I now cannot help but seduce women, my poor Grandmother Helen. 9/10 From the bottom of my heart, Thank You.. Grandmother Helen. 9/10 From the bottom of my heart, Thank You.. This game is worth the price for three reasons: 1.) if you want to have game with women or you want to improve your game, this will help. 2.) It is entertaining and funny. 3.) The actresses are hot. Some of the wrong choices are hilarious. He also gently satirizes the target audience of the game: the protagonist is in a chess club and plays World of Warcraft. I was thoroughly entertained. This is the first in the series, so I expect that Super Seducer 2 will be even better.. Here's the full changelog.. Patch 0.0.4.8 is now live! : With this patch we've done a lot of backend improvements to the matchmaking. Unfortunately it's mainly things you guys won't see, but trust us; it's pretty sweet. Breaking it down; * Fixed matchmaking lobbies getting locked after a failed join * added UI elements to matchmaking lobbies for retrying and better feedback to what's going on. * Added chat to matchmaking lobbies. * Added global chat in the main menu, this will be improved upon over time to allow for channels and other fancy stuff. * Added a "players" counter in the main menu so you can easily see how many are online and where they are playing/what they are doing. * Removed "o" and "p" debug buttons. They were confusing. * Fixed UI bugs with the stats-panel: * XP progress bar wasn't showing proper progress. * Current XP wasn't displaying properly * Next level xp wasn't displaying properly * win/loss ratio was not displaying properly * Fixed matchmaking lobbies getting locked after disconnect Things we know still exist; * Sometimes you may join a strangers main menu lobby if you join just as they abandon a matchmaking game. This is weird. * Small hitches in gameplay at random intervals. * Abandon button sometimes does not respond. We're going to keep fixing things over the weekend!
